

Useful Times Tables Websites

Dear Parents and Carers,

Here is a list of useful websites that provide fun ways for children to learn their times tables. It is the intention that this list will allow you and your child to not only learn times tables but also have fun along the way.

Due to the demands of the Mathematics curriculum, it is essential that children learn their tables if they are to successfully access all areas of mathematical study. For example, without a sound knowledge of times tables, children will have difficulty with fractions, written calculations, area, ratio, percentages and algebra.

Every week, Home Learning will consist of 10 games of 'Hit the Button' on the Topmarks website. Each game is 1 minute long and it gets children used to answering questions at a quick pace. The top link will take you to this.

Many thanks,

Miss Chestnutt
